[Re: N Targ call](#)
[TCE White Paper.pdf](#)

Hi Enrique,

Here are several other documents which may provide some helpful background information on TCE short term issues that we were not sure you had: the Region 10 TCE memorandum; the MEW companies 'white paper' challenging EPA's teratogenic findings; a community response from one of our local activists, Lenny Segal; and, an email from Jim Woolford to Jane regarding his call with Nicholas Targ.

- **Region X's TCE Memorandum** (December 13, 2012) – Establishes regional screening levels to be used in risk assessments accounting for short-term impacts of TCE.

- **MEW Companies' TCE White Paper** (April 18, 2012) – Issue paper from the MEW PRPs challenging EPA's identification of teratogenic impacts from TCE and raising concern about premature application of TCE short-term impacts in the CERCLA process.

- **Lenny Seigel Memorandum re TCE Removal Action Level** (May 29, 2012) – Provides community response to MEW TCE White Paper.

- **Jim Woolford email to Jane Diamond** (March 15, 2013) – Email chain including support from Jim Woolford for Region IX's approach using a removal action level accounting for TCE short term impacts at the MEW Site.

Thanks,

Rich
